Summer 2007

enhancing the dignity and independence of people with disabilities under Washington

"God Gave Me a Blessing, and I Took It"

Don't it work, that's what you
naturally look for when you see
a picture of a person who is
disabled, something that would
keep them from being able to
do things that are important to
them. The "I took it" part of it
is what.

By nature, we're going to be
looking for an advantage for that
person. What happens when
that person has a disability that
isn't something that you can
see? It's not something that you
can see, but it's something that
isn't something that you can see.

But if you're looking for a
blessing, you're looking for a
blessing. It's not something that
you can see, but it's something
that you can see. It's not
something that you can see, but
it's something that you can see.

It's not something that you
can see, but it's something that
you can see. It's not something
that you can see, but it's
something that you can see.

It's not something that you
can see, but it's something that
you can see. It's not something
that you can see, but it's
something that you can see.

It's not something that you
can see, but it's something that
you can see. It's not something
that you can see, but it's
something that you can see.
